DETAILED ACTION

Information Disclosure Statement

1. Applicant's prior art citation filed May 13, 2004 and August 03, 2004 have been received, considered and placed of record.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 54-63 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-10 of prior U.S. Patent No. 6,824,079. This is a double patenting rejection.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double

patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 64-73 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6,824,079. Although the conflicting claims are not identical, they are not patentably distinct from each other because Patent No. '079 teaches an aerosol dispenser assembly having a container that contains liquid product (a propellant that is at most 25% by weight of the contents of the container and the propellant is a dual phase propellant), and a valve attached to the container for selectively dispensing the liquid product (a hydrocarbon propellant and the propellant is free of normal butane). Claims 64-73 of the instant application teaches an aerosol container for containing a liquid product and a propellant for propelling the liquid product from the container. The propellant is a liquefied gas and is present in an amount of at most about 25% by weight of the contents of the container. Pat No. 6,824,079 does not specifically teach the exact claimed invention; however, it is obvious to one skilled artisan in the art to have made the aerosol dispenser having a propellant is a liquefied gas and is present in an amount of at most about 25% by weight of the contents of the container.

Allowable Subject Matter
